## Introduction

Coded Crosswords are a variation of traditional crosswords. Instead of clues, each letter is represented by a number, 1 to 26.

The object is to substitute letters for numbers so that a complete crossword is filled in. Squares with the same number will contain the same letter. Each letter of the alphabet will be used at least one time. The code grid under the puzzle can be used to keep track of letters used.

The puzzles in this volume are divided into two types. There are 100 puzzles with 'American' grids and 30 puzzles with lattice grids. All are 13 x 13 in size.
