Introduction

Sudoku puzzles, which are a type of logic puzzle, are now internationally popular. However, they have been around a long time and were originally known as number place or cross number puzzles. Sudoku means 'single number in an allotted space' in Japanese.

The object of these larger sized Sudoku puzzles is to place the numerals 1 through 9 and letters A through F in a 16 x 16 grid so that each row, each column and each 4 x 4 grid contains each number and letter one time only. You can take a look at the solutions to get the idea if you are new to Sudoku puzzles.

The puzzles in this volume are equally divided by difficulty.
